Dear colleagues

We are pleased to invite you to this year's Scientific Sessions for Cardiovascular Nurses and Allied Professionals. It will take place in the Congress Center in Basel, on Thursday, 22. June 2023 within the Annual Congress of the Swiss Society of Cardiology (SSC), the Swiss Society of Cardio-Thoracic Surgery and the Swiss Society of Pneumology. Further information and the program is found [here](#) on the SSC website.

The topic of the first session is "Breathless": Dyspnea from a cardiac and pneumological perspective, interesting facts about spiroergometry and possible nursing interventions to alleviate it. In another session, we discuss the importance of e-health - future, data overload, alerts, remote diagnostics? In the session "What's new" we learn about a novel, innovative nursing care model for COPD sufferers, get an update on Long Covid, modern pediatric cardiac surgery, and pneumological assessment and management in patients undergoing cardiac surgery. We would especially like to draw your attention to the presentations of exciting cases from practice in the session "Case Reports".

Early registration special offer is available until 25. April 2023.

All members of the Working Group for Cardiovascular Nurses and Allied Professionals/Swiss Association for Nursing Science will receive:

1-Day pass for the Nursing Sessions 22.6.2023: CHF 80.-

3-Day pass for the entire congress 21-23.6 2023: CHF 140.-, including a 1st class return train ticket.

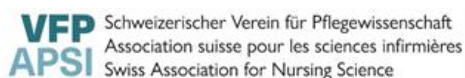

Please register now, and take advantage of the special offer.

Register [here](#).

We are really looking forward to finally being able to welcome you in person in Basel, and for an exciting and interesting exchange of ideas and experiences.

Irene Stalder-Ochsner
Präsidentin AG-KAPT

Prof. Dr. Petra Schäfer-Keller & Lukas Weibel
Co-Präsident:innen AFG Kardiovaskuläre Pflege

Thursday, 22 June 2023
